Profile

A motivated **full-stack developer** with a solid foundation in JavaScript, Node.js, React.js, Express.js, and MongoDB. Passionate about building responsive and scalable web applications. I am quick to learn new technologies and committed to continuous growth. Eager to contribute to innovative projects and collaborate with dynamic teams.

Projects

FoodieHub - A User-Centric Online Food Ordering System

Developed a full-stack web application using the MERN stack (**MongoDB, Express.js, React.js, Node.js**). It allows users to create accounts, log in, and explore a menu of food items. Users can view various food varieties, place orders, and update their profiles.

Datrix - A modern responsive dashboard template

Developed a responsive dashboard template built using **React, Tailwind CSS, and Vite**. The dashboard includes a sliding navigation bar with different sections, a dark mode toggle, responsive design, and several chart components. It is designed to be a starting point for building customizable admin dashboards and other web applications.

Shopify - A ECommerce Website

A simple e-commerce responsive website built using **HTML, CSS, and JS**. It allows users to browse products, add them to the cart, and place orders. The website is designed with a focus on user experience and ease of use.
